SUMMARY

M.Sc. Artificial Intelligence and Machine Learning student at TU Darmstadt with a B.Tech in Computer Science specializing in AI & ML. Academic and project experience with Python, JavaScript, React, PyTorch, TensorFlow, NumPy, and Pandas. Interested in Natural Language Processing (NLP), Large Language Models (LLMs), machine learning, and web-based AI applications. Published research on the application of AI in emergency response systems.

EDUCATION

M.Sc. Artificial Intelligence and Machine Learning *Oct 2024 - Present*
Technische Universität Darmstadt, Germany

B.Tech in Computer Science Engineering (AI & ML Specialization) *Jun 2020 - Apr 2024*
CMR Engineering College, Hyderabad, India | CGPA: 7.73 / 10

Senior Secondary (MPC - Mathematics, Physics, Chemistry) *Jun 2018 - Mar 2020*
Narayana Junior College, Hyderabad, India | 95.8%

TECHNICAL SKILLS

- **Programming - Academic & Project Experience:** Python, JavaScript
- **Machine Learning - Academic & Project Experience:** PyTorch, TensorFlow, NumPy, Pandas
- **Web Development - Project Experience:** React, Node.js, HTML, CSS
- **AI / ML Concepts:** Machine Learning, NLP, LLMs, Recommendation Systems, Sentiment Analysis
- **Tools & Databases:** Git, GitHub, MySQL

PROJECTS

Intelligent Ambulance - Bridging AI and Human Interaction Technologies
- Designed an academic project integrating AI and human-interaction concepts for emergency medical response.
- Explored AI-driven predictive analytics for identifying potential emergencies and supporting faster response.
- Developed decision-support logic for treatment recommendations and streamlined patient-care workflows.

Movie Recommendation System
- Built a content-based movie recommendation project in Python using cosine similarity on genre and description features.
- Created a simple React front end where users select a movie and view similar recommendations.

Sentiment Analysis Web App
- Developed an academic NLP project in Python to classify text as positive, negative, or neutral.
- Built a lightweight React interface for entering text and viewing sentiment predictions.

PUBLICATIONS

The Intelligence Ambulance - Bridging AI and Human Interaction Technologies *July 2024*
- Published in the International Journal of Scientific Research in Engineering and Management (IJSREM), Volume 08, Issue 07.
- ISSN: 2582-3930 | Impact Factor: 8.448

CERTIFICATIONS & ACTIVITIES

- Completed Machine Learning assessments on Coursera and Python assessments on HackerRank.
- Competed in a hackathon at CMR Engineering College, showcasing problem-solving and teamwork.
- Attended technical seminars on Artificial Intelligence at CMR Engineering College.
- Learning German alongside full-time studies, progressing from A2 to B1.

LANGUAGES

- English - C1 (Professional Working Proficiency)
- German - A2, currently progressing to B1
- Telugu - Native
